

Eagles

By:Henry

EAGLES by:Henry Goss

BODY:Eagles are large birds.They weigh from 4 to 15 lbs.They have sharp yellow beaks and strong talons.

HABITAT:Eagles live everywhere except for places that are very cold.They nest in trees.These are the biomes they like to live in: deserts, woodlands, and rainforests.

FOOD: Fish, rabbits, squirrels, and other small animals. Eagles use their sharp talons to grab their prey. Then they use their beaks to tear it apart.

LIFE CYCLE: females lay one to three eggs. They eggs hatch in six weeks. The young stay in the nest for 12 weeks.

FUN FACTS:

Eagles have hollow bones to help them fly.The bald eagle has white feathers on it's head so it looks bald.The eagle is the symbol the U.S.A.
